Subject: [Articulation Officers] 2019-20 Matrix Update -- DUE 28 MARCH

[Provosts and CAOs, please forward this to the individual responsible for generating a response, in case our CARTO list is incorrect.]

Chief Articulation Officers:

It is time for AY 2019-20 annual review and update of the [Master Course Articulation Matrix](#). You will notice that the format is a little different from last year as we have added a section for your feedback on each of the 13 proposed additions or changes.

Please review your campus entries be sure to review all campus course entries to identify any typos, course changes, or realignments -- to ensure what is currently reflected is correct. Please also review the attached common course catalog to ensure

that the courses you list in the matrix fit the catalog description *well enough for your students to have the foundation they need to be able to succeed in the next/following class at any matrix institution.*

TABS 1 & 2. Matrix Updates:

1. Highlight and copy your campus' column in the "Current Matrix" tab
2. Paste your campus column from the matrix into Column C in the "Campus Changes – 2019" tab (currently titled "Paste Your Campus Column from 2018-19 Matrix HERE")
3. Enter changes/corrections in the proper course row in Column D (currently titled "Enter Requested Changes for 2019-20 HERE"). [An example is included in columns J&K; the two example headers are highlighted in green.]
4. Save the "BeginMatrix2018-19-EDITS" file with a new name: "YourCampusName Matrix2019-EDITS." [Feel free to delete the "Current Matrix" tab when you are finished the review, and re-save.]

TAB 3 -- "Proposed Additions-rsvp"

1. Each item has a description of the proposal/request/question. For a new course to be added to the matrix, there should be at least five campuses with course entries.
2. Please address each of the **13** courses included on the tab. Add your equivalent course for the matrix, *** (if transferred by title), or --- (if you have no match at all). Use the comment row to add non-course input or to address the question/concern.

TAB 4 – "Non-Baccalaureate Courses"

One campus has asked about the possibility of differentiating statewide academic articulated courses and non-baccalaureate/technical courses on the matrix so that they could remain available for dual enrollment students in the Career/JumpStart diploma program. Our thought is to highlight those courses in gray (vs yellow), but leave them on the matrix to assist students and advisors in planning a path to completion of an AAS or other technical credential. The courses were identified as such because they had no (or *very few*) equivalent university courses.

On this tab, we ask for your feedback on both the idea and the implementation, e.g.,

- o should these courses be marked as 'technical' and thus exceptions to the minimum placement requirements for DE?
- o are there some that should *not* be designated as 'non-baccalaureate/technical'?
- o are there others that should be included?

If these courses are distinguished as 'non-baccalaureate/technical,' the shading will be explained in the Front Notes.

Feel free to add notes in your email response. Suggestions may include:

- Edits or corrections to the catalog;
- Changes to the [front text that precedes the actual matrix spreadsheet](#);
- Observations about how the matrix and articulation, in general, are working for your students;
- Recommendations for improving the process; and/or
- Anything you would like to offer for the good of your students and/or your campus/region/state.

All edits are due by **Thursday, March 28th**. Please send the new "*YourCampusName* Matrix2019-EDITS" file to lupe.lamadrid@regents.la.gov.

As there will be no May BoR meeting, we would like to present the proposed 2019-2020 Articulation Matrix at the April Board of Regents Meeting so that it will be available for your Summer orientations – but the timing will depend on our receiving a response from every campus on time.

Do let Lupe (225-219-7118) or me know if you have any questions or comments to offer outside of this process.

Thank you for your good work in this project!
