## **ACE Military Guide Online**

For more than a half century, the *Guide to the Evaluation of Educational Experiences in the Armed Services* has been the standard reference work for recognizing learning acquired in the military. Presented here in online format, the *Guide Online* contains ACE recommendations for formal courses and occupations offered by the services as individual exhibits.

- Search Courses
- Search Occupations

New courses and occupations are continually being evaluated by ACE, and these entries are added on a daily basis to the online version. All course and occupation exhibits from the 1954-89 archived edition of the *Guide* also have been integrated into the online version. Thus, the information you view online is up-to-date at all times.

We hope that this edition of the *Guide to the Evaluation of Educational Experiences in the Armed Services* will help all users identify, evaluate, and award college credit for military training.
