ADVANCED PRACTICE

Designed for all advanced practice nursing programs, Typhon Group's **NPST Student Tracking System** functions as a complete and secure electronic student tracking system, including comprehensive clinical skill logs and reports, a fully-featured evaluation and survey component, student scheduling, student electronic portfolios, student and preceptor databases, clinical site database, curriculum mapping, secure document management, and much more.

Advanced, Powerful & Easy-To-Use Software for Everyone

Program Directors - Monitor student clinical experiences through reports, curriculum mapping, and evaluations.

Clinical Coordinators - Manage the ever-growing list of site/preceptor affiliation agreements and schedule students appropriately.

Administrative Assistants - Access and manage the details of every student in your program, including licenses and immunization documents.

Faculty - Monitor the progress of student clinical experiences, ensuring the objectives of each course are being met.

Preceptors - Evaluate students, approve clinical experiences, and keep contact info up-to-date.

Students - Report their clinical experiences, take evaluations, and build a portfolio to use when job hunting after graduation.
