Hi [REDACTED]

Thanks for updating everyone involved on the status issue. While this is concerning it is awesome that both you and [REDACTED] were able to dig in and figure out what the issue was so that moving forward it can be corrected.

With that said we will work on determining if we are able to offer those individuals on the list an opportunity to purchase. We were notified around 4:30 p.m. yesterday afternoon that we would be losing an additional 50 spaces in the Zone 36 lot until mid to late February of 2019.

This is in addition to the 400 we lost at the beginning of the semester and another additional 85 spaces in the gravel lot behind Parker Hall going away until the Fall of 2019.

I will be working on this over the next day or so but the only option may be Blackham Coliseum and the addition of more shuttle services. I will keep everyone posted in the next day or so to determine if I find alternate solutions.

---

I was able to tell [REDACTED] about the conversations I've been having with [REDACTED] today.

It seems that our Fellows were not transferred over to your system as graduate assistants, because they are not graduate assistants. Their status in the system is 'fellow'. Thus, none of them were given the opportunity to purchase a permit. I have given [REDACTED] our list of fellows and have also attached a list to this email. We are hoping that you will reach out to these students, as they are the best and brightest in our Graduate School Community and should be given the opportunity to purchase a permit.

We would also like to ask that the Graduate School be notified before Transportation Services reaches out to the students, because we have over 100 new PAF's that have not yet been processed. This means that these students were also not eligible to purchase a permit. Thank you.

Best regards,

He is correct in the circumstances as there was a glitch in the system this morning and it didn't open at midnight as was planned. When we figured that out this morning, we discussed internally and felt like the best option was to send out additional emails and social media posts and give everyone time to reset for a noon launch. We felt this was fair option opposed to just opening it up without notifying the students.

Please let us know if you would like to extend this offer to [REDACTED]

I understand the frustration below and I am willing to assist him by allowing him to purchase a permit for zone 36. We can possibly do a few of these on a case by case basis however we would not be able to accommodate everyone's request due to limitations of the lots.

Cassie has also been talking with [REDACTED] and there seems to be some issues with some of the GA's and they are not listed in Banner as such or are not being brought over into our system correctly. We have been in contact with the Registrars office and have also reached out to OIT in hopes they can advise why this has happened.

This is causing additional frustration on the part of the students as well.

Dear [REDACTED]

The parking situation for graduate students has just hit new level of frustration. Yesterday afternoon grad students were informed that parking passes would go on sale that same night at midnight. I, along with every other grad student I know stayed up to sign up immediately. It turned out there was a problem and that passes did not go on sale. We all got emails the next morning around 7am that passes would go on sale 5 hours later at noon. This coincided with a meeting I'd scheduled with a professor weeks ago, and by the time the meeting was over around 1pm, passes for lot 36 were sold out. This is extremely frustrating, and I am sure I am not the only one who is in this situation as noon on a Tuesday is often a time that grad students already have booked. Can anything be done about this?

Thank you,

[REDACTED]
