Office of Research and Sponsored Programs

The Office of Research and Sponsored Programs is a service office that reports to the Vice President for Research. Activities of ORSP are designed to help the faculty and facilitate the overall grant process, while balancing the need for institutional and sponsor regulatory compliance. ORSP assists university investigators in identifying funding opportunities, conceptualizing and preparing grant proposals, securing institutional approval for proposals, and submitting proposals for funding. ORSP also manages several programs to ensure compliance with federal regulations.
