Banner ERP Information

You've probably heard the term "ERP" used on campus over the last couple of years. Chances are, you still aren't quite sure what it means or what it has to do with you.

ERP stands for enterprise resource planning, which describes a business process management software. This specialized software provides a system of integrated applications for managing business processes and automating office functions related to technology, services and human resources.

Basically, an ERP is how we run things around here, from admissions to payroll and purchasing requests.

In UL Lafayette's case, we're implementing a new ERP called Banner to replace ISIS and improve business processes.

You can learn all about Banner, the ERP process and implementation, as well as what's coming down the pipeline that will affect you. Just take a look around our site and [let us know if you have any questions.](#)

What's in it for me?

You may be wondering what all of this ERP buzz has to do with you. The truth is changes that will happen through the ERP will affect everyone on campus—in many positive ways.

From fewer paper forms to fill out, to easy time sheet entry, the new ERP will improve communications and workflow for us all.
