

2016-2017 Assessment Cycle COLA_Speech Pathology and Audiology MS

Mission (due 1/20/17)

University Mission

The University of Louisiana at Lafayette offers an exceptional education informed by diverse worldviews grounded in tradition, heritage, and culture. We develop leaders and innovators who advance knowledge, cultivate aesthetic sensibility, and improve the human condition.

University Values

We strive to create a community of leaders and innovators in an environment that fosters a desire to advance and disseminate knowledge. We support the mission of the university by actualizing our core values of equity, integrity, intellectual curiosity, creativity, tradition, transparency, respect, collaboration, pluralism, and sustainability.

University Vision

We strive to be included in the top 25% of our peer institutions by 2020, improving our national and international status and recognition.

College / Department / Program Mission

College Mission

Provide the college mission in the space provided. If none is available, write "None Available in 2016-2017."

The College of Liberal Arts is dedicated to the advancement of knowledge through teaching, research, and service. The College teaches students to think critically, applying scientific principles and intellectual schema to understand human behavior and society in a diverse world, to express ideas and ideals in a variety of forms, and to understand themselves and others as members of regional and global communities. The intellectual and creative foundations of this enterprise are written and oral communication, analytical and reasoning skills, and the ability to solve problems creatively. Each departmental curriculum presents perspectives from the past, provides an understanding of the present and directs attention to the challenges of the future. As active researchers, faculty in the College work to advance the frontiers of knowledge and our understanding of humanity and the world we live in, and to use that knowledge and understanding to improve the human condition.

Department / Program Mission

Provide the department / program mission in the space provided. If none is available, write "None Available in 2016-2017".

The Department of Communicative Disorders is dedicated to understanding how communication works and how it breaks down in order to design and implement better ways to prevent communicative disorders as well as design and teach better intervention procedures. Our ultimate mission is to enable individuals with communication disorders to lead richer, full, more productive lives.

Assessment Plan (due 1/20/17)

Assessment List (Goals / Objectives, Assessment Measures and Criteria for Success)

Assessment List

| Goal/Objective | The student will demonstrate knowledge of the nature of speech, Language and hearing and of communication and swallowing disorders sufficient for entry level positions as a speech-language pathology clinical fellow. | | | | | | | | |

| | Direct - Capstone Assignment | Has the criterion Written summaries of the ethics topic discussed in Capstone Seminar will be evaluated by 2 faculty members using a 4 point writing rubric with emphasis on knowledge aspects of their writing. Approximately 1/3 of summaries will be chosen randomly for evaluation. Scores will be compared and agreement reached on any discrepancies. The goal is that 100% of students will earn a rating of 3 (Effective) or above on the appropriateness, accuracy, extensiveness and perspective aspects of the writing rubric with 40% being rated as 4 (outstanding). been met yet? | This objective was not assessed this cycle due to a planned rotation of objectives to be assessed. It will be assessed again in the 2017-2018 cycle. | | |

Assessment List Findings for the Assessment Measure level for The student will demonstrate skill in written communication sufficient for entry into professional practice.

Not met</p> | <p>Results show that 77% of students were rated at the effective level or above with 11% given at rating of outstanding.</p> | | | <p>- Student/Faculty Support (for Educational Programs): Results were shared with the faculty and issues discussed included the extent to which supervisory styles might impact the product we are evaluating. A committee was formed to investigate this possibility. In order to facilitate improvement we will provide additional support from faculty within the department and make use of university resources through grand rounds and additional professional writing workshops and presentations. - Assessment Process: Measures changed: The "perspective portion of our assessment rubric was not productive in evaluation of the diagnostic reports that were reviewed. We will modify that index on the rubric. The faculty also decided to limit reports sampled to those produced by a student who had already completed at</p> |

Reflection (Due 9/15/17)

Reflection

1) How were assessment results shared in the unit?

Please select all that apply. If "other", please use the text box to elaborate.

Distributed via email

Presented formally at staff / department / committee meetings (selected)

Discussed informally (selected)

Other (explain in text box below)

2) How frequently were assessment results shared in the unit?

Frequently (>4 times per cycle)

Periodically (2-4 times per cycle) (selected)

Once per cycle

Results were not shared this cycle

3) With whom were assessment results shared?

Please select all that apply.

Department Head (selected)

Dean / Asst. or Assoc. Dean

Departmental assessment committee (selected)

Other faculty / staff (selected)

4) What were the measurable or perceivable effects on your current (2016-2017) findings based on prior action plans (created in 2015-2016)?

The most recent action plan with regard to professional writing, changed the product that we evaluated from any clinical report to only first drafts of diagnostic reports. The reason for this change was that other reports reflected the editing and input of the clinical supervisor by the time they were submitted for review by the assessment committee. We did not feel that adequately sampled the student's ability to write professionally without editing - something that they should be able to do as a graduate of this program. The measurable effect was that we did not meet our target for this goal. Whether this was due to the change in products sampled or to the particular student writers that made up the sample is hard to tell. We did make some changes for the next time this objective is measured in both the rubric (how we measure proficiency) and in the product we choose to sample. Ho The other declines in student performance on the national exam were a surprise

as there were no real changes in student success in classes and clinic. We did not actually implement the suggested action plan which was proposed several cycles prior. We had suggested that we should provide the opportunity for review of basic undergraduate information in a formal way to students in the department. The department did purchase two review books which also come with sample tests and some students did borrow these for study.

5) What has the unit learned from the current assessment cycle?

Through discussions and analysis of the assessment results we learned 3 things. First is that many of our master's level classes have fewer focused writing assignments . If writing assignments are given, there are often graded based on ideas/content rather than the specifics of writing that we are assessing in our program assessment. The reason given is the increase in class size caused by the increase in the number of students in a cohort (increase from 25 max to 35 max). There is not enough time to read and grade multiple writing assignments like reflections, term papers and even discussion based tests. Second, there is no specific place in the curriculum where students are given specific guidance or direction in what makes good professional writing versus poor. Clinic reports are corrected and students competence is reflected as one component of their overall clinic grade, but students see this often as just an exercise in making corrections and revisions to please the supervising clinician and see this more as punishment than a positive learning experience. The third thing that was learned is that a good number of students (about 30 % based on some recent exit exams) still see a disconnect between what they are taught in the classroom as best practice and what they are asked to do in the clinical setting - both in on campus clinic and in off-campus sites. The assessment committee also saw evidence of this in the diagnostic reports that they reviewed. This is something that we address in our strategic plan and additional strategies will be tried to see if we can make some improvements here.
